**If ANY of the questions below apply to you, please inform the
Screening Person and
Do Not Enter the Hall**

1. Have you been in contact with anyone with or suspected of having COVID-19 in the last 14 days?
2. Has anyone in your household had COVID-19 symptoms in the last 2 weeks?
3. Have you been advised to self-isolate due to an infection within another setting, such as school?
4. Have you returned from a foreign country in the past 14 days, one without a travel bubble and therefore should be in quarantine?
5. Do you have a new persistent cough?
6. Have you had any loss of taste or smell?
7. Do you have any underlying health conditions that would put you at further risk should you contract COVID-19?
 - Cardiovascular problems
 - High blood pressure
 - Diabetes
 - Chronic kidney or liver disease
 - Compromised immunity diseases
 - Obesity (BMI 40+)

Screening Process

1. Put on Level 2 PPE (Donning - see attached sheet)
2. Take own Temperature, confirm Screening questions and record on sheet
3. For Each player
 - Ask player if any screening questions apply
 - Take Player temperature using Infrared Thermometer holding at arms length, 25-50 from forehead - recorded temperature must be below 37.8°C.
 - Record screening on sheet.
4. Take Off PPE (doffing – see attached sheet)
5. Send copy of screening sheet to Covid Officer

For additional Guidance see Screening video on the Basketball England Website (<https://www.basketballengland.co.uk/safeguarding/return-to-play-resources/>)

Putting on personal protective equipment (PPE)

Standard Infection Control Precautions

Please see donning and doffing video to support this guidance: https://youtu.be/-GncQ_ed-9w

Pre-donning instructions:

- Ensure healthcare worker hydrated
- Remove jewellery
- Tie hair back
- Check PPE in the correct size is available

- 1** Perform hand hygiene before putting on PPE.

- 2** Put on apron and tie at waist.

- 3** Put on facemask – position upper straps on the crown of your head, lower strap at nape of neck.

- 4** With both hands, mould the metal strap over the bridge of your nose.

- 5** Don eye protection if required.

- 6** Put on gloves.

Taking off personal protective equipment (PPE)

Standard Infection Control Precautions

Please see donning and doffing video to support this guidance: https://youtu.be/-GncQ_ed-9w

• PPE should be removed in an order that minimises the risk of self-contamination

• Gloves, aprons (and eye protection if used) should be taken off in the patient's room or cohort area

1 Remove gloves. Grasp the outside of glove with the opposite gloved hand; peel off.

Hold the removed glove in the remaining gloved hand.

Slide the fingers of the un-gloved hand under the remaining glove at the wrist.

Peel the remaining glove off over the first glove and discard.

2 Clean hands.

3 Apron.

Unfasten or break apron ties at the neck and let the apron fold down on itself.

Break ties at waist and fold apron in on itself – do not touch the outside – **this will be contaminated.** Discard.

4 Remove eye protection if worn.

Use both hands to handle the straps by pulling away from face and discard.

5 Clean hands.

6 Remove facemask once your clinical work is completed.

Untie or break bottom ties, followed by top ties or elastic, and remove by handling the ties only. Lean forward slightly. Discard. **DO NOT** reuse once removed.

7 Clean hands with soap and water.
